

About GIGA Storage:

GIGA Storage is a developer, investor, and operator of large-scale energy storage projects. Our mission is to accelerate the shutdown of gas and coal power plants. We achieve this by implementing our large-scale energy storage projects and smartly managing them with our proprietary platform. This contributes to a more efficient utilization of our electricity grid, enabling greater utilization of sustainably generated energy. We are a key player in the Dutch market, established in 2018, and have outgrown the startup phase. Our team consists of driven professionals who work in an environment of close collaboration with internal and external stakeholders. Trust and open communication are core values for us. Recently, GIGA Storage opened the largest battery in the Netherlands. In the coming years, many more large-scale projects will be realized in the Netherlands and neighboring countries.

Job Description:

As Asset Manager, you will share responsibility for the management and maintenance of our battery sites. You will shape the setup of Asset Management at Giga Storage and provide periodic reports to the COO regarding the condition of the installations, potential improvements, and availability.

Giga Storage views the asset manager as a crucial role in ensuring the safety, reliability, and efficiency of the electrical infrastructure.

What will you do?

- **Daily Management:** Together with the responsible personnel, you will be responsible for keeping our installations operational. You will coordinate the activities at the sites with the team and provide support to contract parties as needed.
- **On-Call Service:** You will participate in the operational team's on-call rotation. This means you will be the primary point of contact in case of technical failures with the batteries.
- **Asset Management:** Ensuring proper registration of assets and maintaining detailed documentation, including technical specifications, maintenance reports, inspection records, and other relevant information about the electrical installations.
- **Maintenance:** Creating maintenance plans for the installations, coordinating maintenance activities, including regular inspections, preventive maintenance, and potential upgrades or replacements. The goal is always to optimize maintenance to maximize the availability of the installations.
- **Risk Management:** Identifying and assessing risks related to the electrical installations, such as fire hazards, overloads, outdated components, and implementing measures to mitigate these risks.
- **Budgeting and Cost Control:** Managing the budget for maintenance and repair of the electrical installation, including obtaining quotations, assessing costs, and ensuring cost-effective solutions.

Who are you?

- You have a technical background, preferably in electrical or energy engineering.
- You work and think at the HBO (higher professional education) level and are enthusiastic about progressive technical projects.
- You have a minimum of 5 years of experience in the field of asset management.
- You are familiar with NEN 3140/NEN 3840 standards.
- You are capable of professionally setting up asset management.
- You can oversee the daily operations effectively.
- You possess organizational talent and enjoy bringing structure and working in a planned manner.
- You have excellent verbal and written communication skills in both Dutch and English.
- You function well both independently and as part of a team.

- You have excellent knowledge of MS Office (Outlook, PowerPoint, Word, Excel).

What we offer:

Working at GIGA Storage means, first and foremost, that you identify with our mission and can actively contribute to our core values. Within our organization, there is a strong focus on your development and personal growth. You will be part of a dynamic work environment within a rapidly growing (international) organization, characterized by an informal, transparent, and pleasant work culture that encourages individual ideas and initiatives.

- Competitive salary
- Full-time employment (40 hours)
- 28 vacation days
- Vacation allowance 8%
- Year-end bonus 7-9%
- Profit-sharing
- Stock Appreciation Right program
- Good pension scheme
- Travel expense reimbursement
- Laptop
- Phone allowance
- Work-from-home possibilities
- Ample training and development opportunities
- Enjoyable work atmosphere and great colleagues
- Exciting and innovative projects
